

ST AIDAN'S

Risk Assessment for Opening Church Buildings to the Public

Version Control

Issue Date	Version Number	Issued by
6 th August 2020	5	The House of Bishops COVID-19 Recovery Group

This update includes risk factors around the requirement to wear face coverings in places of worship from 8th August.

Churches and cathedrals have been legally permitted to open for purposes of individual private prayer from 13th June. House of Bishops guidance provided for churches to open for funerals from 15th June. Public worship, with measures in place for social distancing, are allowed from 4th July. Other activities, except for a few still prohibited by law, may also take place in churches, subject to the government guidance in place for the relevant sector.

The government guidance for the safe use of places of worship during the pandemic requires a COVID-19 risk assessment to be carried out for every building and site open to the public. This document provides a template risk assessment, with links to the relevant advice notes. It relates to opening up church and cathedral buildings to clergy and members of the public entering for any permitted purposes. As well as offering guidance on best-practice, it is also intended to help parishes make a decision on whether to open for any or all of these purposes or not, based on their local circumstances, resources and context. You should read the advice on re-opening buildings and the guidance on public worship before completing this assessment. Both are available on the Church of England Coronavirus pages.

Future versions of this document will be produced when there is any substantive change to the guidance on the safe use of places of worship.

A separate risk assessment relating to contractors and construction workers is available on the Church of England Coronavirus pages.

THE CHURCH OF ENGLAND

Carrying out a risk assessment

- 1. Agree what activities you are planning for:
 - Private prayer (clergy only)
 - Livestreaming services (clergy only)
 - Private prayer (general public)
 - Public worship
 - Rites of passage services
 - Opening for visitors and tourists
- 2. Consider the hazards:
 - Transmission of COVID-19
 - Hazards arising from the temporary closure of the church
 - Hazards arising from now using the church in a different way

Read the guidance and think about how it relates specifically to your church. What constraints are there? Consider how people will arrive at the church, including if they will need to wait or queue outside; how people will enter and leave the church; circulation inside: from the entrance to the worship space and out again; circulation within the worship space; also access to other areas including the toilet(s).

- 3. Consider who might be harmed and how? Read the guidance and think about how the activities you are planning will affect different groups of people. The risks are not different for larger churches so long as they are properly managed, but having more people coming through your building makes the possible impact for example of someone with COVID-19 coming into contact with others higher than in smaller venues with fewer people. Consider your particular circumstances and adapt the checklist below as appropriate.
- 4. Using the risk assessment checklist below as a template:
 - add in mitigations for any risks that are particular to your circumstances that may not be on the list;
 - record what you need to do for each activity to go ahead safely;
 - consider any equipment you need and any temporary changes you might need to make to the church;
 - check back against your list of activities to confirm which ones can go ahead and when.
